

RREVUS

Powered height adjustable system for all interactive whiteboards.

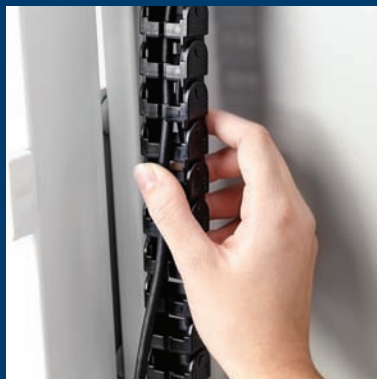

Product by Sahara Interactive

Big castors to move the stand easily.

Cable guide to protect all the cables when moving.

The mobile stand comes with a tray for a laptop or computer.

HEIGHT ADJUSTABLE SYSTEM

The RRevus system is a unique electric height adjustable system for all* interactive whiteboards.

It is very easy to mount the system to the wall or on a mobile stand. Because of the flexibility every interactive board and (ultra) short throw projector is easily installed.

With two buttons the board can be moved up and down in a stable manner. Calibrating the projector after adjusting the system is not necessary.

SLIM FIT

The RRevus system is slim and fits through every door when moving the mobile stand.

EASY INSTALL

When you have set the right height for the board; place the board into the upper brackets. Next, rest the board in the lower brackets.

Fix the upper brackets to the board.

Finish with fixing the lower brackets.
